## Memorandum

Date: January 27, 2006  
To: All Certified Manufacturers Pursuant to AC 150/5345-42D  
From: Rick Marinelli, Manager, Airport Engineering Division, AAS-100  
Subject: Changes to AC 150/5345-42D

---

This is to inform you that the fully effective date of Advisory Circular (AC) 150/5345-42D is extended 21 days from January 29, 2006 to February 19, 2006. The purpose for this extension is for the evaluation of several editorial changes that are being considered for this document. Please be aware that as of the signing of 42D on April 29, 2005 manufacturers have been permitted to become certified to, and to manufacture to, the standards of 42D. The extension of the transition period simply extends the time frame within which manufacturers are concurrently permitted to continue to manufacture to the standards of 42C. There will be no major changes to the current version. The change will be posted as soon as this evaluation is complete.

Rick Marinelli
